Internship programme overview
D125b, 1st Floor, Puri Highstreet, Sector 81, Faridabad, Haryana
goforgedigital.com

A summary for students and college training cells.
Every certificate and internship letter carries an ID
that colleges and employers can verify online.

How it runs

Two programmes, 3 or 6 months:
- 3-Month Programme: 1 month training + 2 months internship.
- 6-Month Programme: 3 months training + 3 months internship.
  3-Month Programme festive launch price: Rs 1,499, all-inclusive.
  6-Month Programme festive launch price: Rs 1,999, all-inclusive.

Training is live online. The internship is supervised.
Who can apply: BTech, BCA and similar courses.
Projects and internship included.
Next batch: January 2027. Dates on the counselling call.
Every class is recorded. Pause during college exams, or
switch once to a later batch at no cost.

What you receive

- Skills in the role you chose.
- One project you can explain.
- A training certificate.
- An internship letter with your name, college, role, exact dates,
  that the work was online, two or three lines on the work you did,
  and a signatory who can be contacted to check the letter.

College support

- Issued by an MSME-registered company.
- College-specific formats, hours or an NOC on request.
- Check the weeks or hours your college needs, then pick a programme.

How a project is chosen

The project matches your programme: real studio work or an
industry-style project, reviewed by a mentor.

Roles

Software Engineering
Tools: JavaScript or Python, Git and GitHub, A relational database and basic SQL, REST APIs, Simple automated tests.

A small feature in a studio project: a form that saves a record, a list with a filter, and a short note on how you tested it.

AI/ML Engineer
Tools: Python, Jupyter or a plain script, Pandas for tables, An AI API used with a written prompt, A simple check sheet for w
A small tool that drafts a reply or sorts records, plus a note of ten cases where the draft was wrong and what you changed.

Data Analyst
Tools: Excel or Google Sheets, SQL, Power BI or a similar dashboard tool, A spreadsheet of checks before a chart is trusted
A cleaned table, one dashboard, and a one-page note that says what the numbers do and do not show.
